I am a front-end web developer focused in gathering requirements and designing website layouts, which I transform into animated, user-friendly interfaces. I love designing websites that meet development standards, and I also enjoy learning throughout the process.

EXPERIENCE

FRONT-END DEVELOPER, INVIFAR

Jul 2023 – Jun 2024

- Collaborated with DevOps and QA teams to optimize development workflows, automate processes, and ensure high-quality software through effective testing and deployment strategies.
- Create a website where drug resistance researchers can share their articles/protocols/results.
- Design navigation maps and user experiences to ensure intuitive and user-friendly interfaces.

Technologies/tools: HTML, CSS, JS, Bootstrap, Docker, GitHub, SonarQube and Slack

TECHNICAL SUPPORT, UNIVERSITY OF COLIMA

Sep 2022 – Sep 2023

- Management of the institutional CMS to benefit UCOL students and staff.
- Improve the management and preventive maintenance of technological infrastructure.
- Installation and configuration of internet and Wi-Fi networks, including the setup of routers, access points, and network security measures to ensure reliable and secure connectivity for all users.
- Repair and configure IT equipment, troubleshoot issues, and optimize system performance.

Technologies/tools: CMS, Cisco, TP-LINK, Linux, Macrium, Rufus, Klein Tools and Ubiquiti.

TECHNICAL SUPPORT, UNINET TELMEX

May 2022 - Jul 2022

- Apprentice in business technical support, assisting with troubleshooting and resolving issues while gaining experience in customer service and technical problem-solving.
- Business internet installation, including setup, configuration, and testing of network infrastructure to ensure reliable and high-speed connectivity.
- Creation of network cables, including cutting, stripping, crimping, and testing for reliable data transmission.

Technologies/tools: Cisco, AnyDesk and Slack

EDUCATION

Aug 2020 – Jun 2024 - Software Engineering

School of Telematics

University of Colima
