Rodrigo Vladimir Rodríguez Zamora

Software Engineer

Colima, México (CST)
dev.vladimirro@gmail.com
Linkedin • **GitHub** • **Portafolio**

Software Engineer with multidisciplinary experience in software, hardware, networking, and telecommunications. Skilled in designing and implementing customer-focused technology solutions while adhering to quality standards and continuous improvement principles. Open to relocation based on business and position requirements.

EXPERIENCE

TECHNOLOGY SUPPORT ENGINEER – SEGURITECH
October 2024 – Present

- **SLA Optimization and Incident Management**: Resolved intermittent issues in the state monitoring infrastructure through network and Intelligent Monitoring Point (PMI) maintenance, reducing incidents from 50 per day to 40 per week across internal and external infrastructure teams, improving service availability and monitoring system visibility.
- **PMI Project Implementation**: Coordinated and implemented Intelligent Monitoring Point (PMI) projects, including soil studies, line-of-sight analysis, field visits, and technical, legal, and operational coordination with suppliers and third parties.
- **Comprehensive Maintenance**: Performed preventive and corrective maintenance on advanced systems, including urban video surveillance and highway monitoring systems.
- **Network Infrastructure Management**: Provided technical support for wireless and data networks, ensuring reliable communications and operational continuity.
- **Data Center Technology**: Implemented and maintained critical technologies in monitoring centers and data centers to ensure optimal performance.
- **Working at Heights**: Installed, configured, and maintained technological equipment on poles, towers, and highway gantries.

Technologies/Tools: Cambium Networks, Ubiquiti, Cisco, HP, Starlink, Moxa, Axis, LinkPlanner, SLA, ITIL Methodology, DC-3 and other networking and telecommunications solutions.

WEB DEVELOPER, INVIFAR
July 2023 – June 2024

- **Platform Traffic and Reach Growth**: Increased interest and engagement through the implementation of online courses, growing the number of specialized pharmacovigilance researchers interested in obtaining a certificate from 3 to over 100.
- **Software Development and Quality Optimization**: Collaborated with DevOps and QA teams to optimize development workflows, automate processes, and ensure high software quality through effective testing and deployment strategies.
- **Web Solutions Development**: Developed a website where drug resistance researchers can share their articles, protocols, and research findings.
- **User Experience Design**: Designed navigation maps and user experiences to ensure intuitive, user-friendly interfaces.

Technologies/Tools: HTML, CSS, JS, Bootstrap, Docker, GitHub, SonarQube, Slack

LEVEL 2 TECHNICAL SUPPORT SPECIALIST, UNIVERSITY OF COLIMA

September 2022 – September 2023

- **Information Systems Administration**: Managed the institution's content management system (CMS) to support students and staff at the University of Colima (UCOL).
- **Technology Infrastructure Optimization and Maintenance**: Improved technology infrastructure management and preventive maintenance to enhance system and equipment performance.
- **Network Implementation and Configuration**: Installed and configured internet and Wi-Fi 6 networks, including routers, access points, and network security measures, ensuring reliable and secure connectivity for approximately 10,000 users.
- **Technical Support and Troubleshooting**: Repaired and configured computer equipment, resolved technical issues, and optimized system performance.

Technologies/Tools: CMS, Cisco, TP-LINK, Linux, Macrium, Rufus, Klein Tools, Ubiquiti.

SUPPORT ENGINEER, UNINET TELMEX

May 2022 - July 2022

- **Enterprise Technical Support**: Worked as a technical support trainee, assisting with troubleshooting while gaining experience in customer service and technical issue resolution.
- **Enterprise Network Deployment**: Installed and configured internet services and network infrastructure for large-scale organizations across industries such as banking, healthcare, and retail, including remote configuration and connectivity testing to ensure reliable, high-performance communications.
- **Network Cable Assembly and Testing**: Assembled network cables by cutting, stripping, crimping connectors, and testing them to ensure reliable data transmission.

Technologies/Tools: Cisco, AnyDesk, USB console wires.

E D U C A TION

Bachelor's Degree in Software Engineering

August 2020 – June 2024

Faculty of Telematics, University of Colima

SKILLS

Feedback and support to achieve the best possible outcomes • Creative solutions • Commitment to teamwork • Willingness to learn • ITIL Framework

TECHNICAL SKILLS

HTML5, CSS3, JavaScript, Bootstrap, Docker, Vite, GitHub, React.js, NodeJS, MySql, Python, C/C++ and Figma

LANGUAGES

- Spanish: Native
- English: Advanced
